1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20,22-25,30,32-33, drawn to a color image forming apparatus which transmits a driving force to the charge brush from either the image supporter or developing roller (mechanical arrangement), classified in class 399, subclass 175.
- II. Claims 21,26-29,31,34-36, drawn to a color image forming apparatus which controls the drive operation to the charge roller depending on if a monochrome image is being formed (control operation depending on if condition (e.g. monochrome image being formed)) is met , classified in class 399, subclass 50.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as transmitting the drive force to the charge brushes from either the developing roller or image supporter without regard to whether a monochrome image is being formed. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Beatty whose telephone number is (571) 272-2130. The examiner can normally be reached on M-F from 9 to 6.
